

Thank you Eric for reaching out, I greatly appreciate this opportunity

As far as your 2 questions, based on the area we live in, it is very highly recommended to staff that the employment of bi-lingual individuals is a great aspect of the community we currently have, and I believe the township does understand and reflects on what would be needed to keep their natural language a priority.

The main policy I believe, is a personal one to myself, as a resident here now for 4 years, when I see a comment, "French Translation will be forthcoming" This is an issue, no communication in my opinion should be released, until this has been completed, therefore, if it means, we would hold back the English version, then so be it, we have 2 languages in this country that are both recognized as our official languages, and the releasing of information early with one, again in my opinion is an unacceptable practise.

Thanks again

Dale
