

Hello Eric

Thank you for reaching out to me first of all. Thank you for bringing to my attention the fact that Schreiber has a 6% Francophone community. I did not realize that. In my 35 years of working for a high-tech company I travelled to Quebec monthly over those years. I was proud to find out that family values were alive and well in that province. Bromont Quebec is still my favourite place to visit. It is the people that make it special.

In answer to your questions

I would like to see more involvement in committees by the francophone community. We want to hear your views so we can become an all inclusive community. I was proud to see the Franco Ontario flag being displayed on a house in my neighbourhood and wondered why it was not flying at our town hall on September 25th.

In answer to your second question. I would do my best to make sure any communication to the public is in both languages. Either on our website or newsletters or social media posts. I was proud when our prime minister pushed back on President Trump over French appearing on labels. We have 2 languages in this country French and English and it's not up for negotiation.

I hope this answers your questions. I hope we can talk further after the election.

Again thank you for reaching out to me.

Sincerely

Ken Cook
