

Those are great questions

First question. I think it needs to be in

In all schools. And learning centres with that being said in Manitouswadge public schools. It at part one half is French and the other side English which the English side dose have classes for French

Second question I would put in place is to have the School board if they already doing it is to have a grade 1-8 French class and same with the high school grade 9-12 but also if you want to get more advanced or update have French course at the learning center in Manitouswadge
