

Hello Eric,

Question 1, all places spaces and forums.

Ask for more community engagement from the Francophone community, including folks like yourself. Not only the francophone community, but our first nations and indigenous communities.

The appropriate language should be something offered in all aspects of municipal framework. And so this might mean for some Hindi language or Anishnaabe Moen and of course French speaking.

When we failed to accommodate one group, we inadvertently discriminate against that particular demographic.

My apologies I was just in a meeting with my daughter's legal team.

If you don't have my phone number, it is [807-633-7033](tel:807-633-7033)

Feel free to reach out and if I have the time to speak with you, I would be more than happy to.

Patrick Cully
