

The Francophone community is an integral part of Thunder Bay, contributing to our cultural diversity and local economy. Their place in our municipality should be one of full inclusion and active participation. The policies that I would like to see are: access to services in French where feasible; support of Francophone cultural and community initiatives; and inclusion of Francophones in consultations and decision-making processes.

My two daughters were in French immersion during their schooling. I hope that more people start learning and speaking French at an early age.

We should all continue to be aware that French is one of our official languages.
