

Our Francophone community represents about 16% of Marathon, so I think it is important that we continue to recognize and support that part of our community.

I would support accessible Town information and services in French where required, one of our problems is employees, we struggle having Francophone people apply. I would like to see greater opportunities for Francophone residents to participate in Town events, engagement and community activities. Most importantly, I think we try to listen to our Francophone residents and organizations about what they would like to see from the Town.

Everyone in Marathon should feel represented, included and heard.  
Thanks

Rick Dumas
